

Sixth Grade - Rational Numbers

1) Use the distributive law to evaluate $11^2 + (11 \times 4) - (10 \times 11)$

- 65
- 55
- 45
- 35

2) Use the distributive law to evaluate $22^2 + (22 \times 5) - (12 \times 22)$

- 250
- 280
- 330
- 210

3) Use the distributive law to evaluate $41^2 + (41 \times 5) - (41 \times 2)$

- 1790
- 1804
- 1705
- 1890

4) Use the distributive law to evaluate $32^2 + (32 \times 6) - (32 \times 10)$

- 756
- 896
- 789
- 812

5) Use the distributive law to evaluate $52^2 + (52 \times 6) - (52 \times 10)$

- 1850
- 1976
- 1910
- 1890

6) Use the distributive law to evaluate $20^2 + (20 \times 6) - (20 \times 10)$

- 800
- 500
- 600
- 700

7) Use the distributive law to evaluate $10^2 + (10 \times 6) - (10 \times 4)$

- 250
- 220
- 200
- 120

8) Use the distributive law to evaluate $13^2 + (13 \times 8) - (13 \times 5)$

- 240
- 210
- 180
- 208

9) Use the distributive law to evaluate $19^2 + (19 \times 8) - (19 \times 5)$

- 400
- 418
- 390
- 350

10) Use the distributive law to evaluate $11^2 + (11 \times 5) - (11 \times 5)$

- 112
- 140
- 132
- 120

11) Evaluate: $4 \times 10 - (-16) / 4$

- 44
- 65
- 34
- 54

12) Evaluate: $6 \times 10 - (-18) / 3$

- 56
- 70
- 90
- 66

13) Evaluate: $6 \times 7 - (-50) / 5$

- 24
- 42
- 40
- 30

14) Evaluate: $8 \times 7 - (-40) / 5$

- 70
- 50

- 64
- 54

15) Evaluate: $9 \times 7 - (-45) / 9$

- 68
- 50
- 55
- 60

16) Evaluate: $7 \times 7 - (-49) / 7$

- 56
- 50
- 60
- 66

17) Evaluate: $3 \times 7 - (-42) / 7$

- 20
- 21
- 27
- 17

18) Evaluate: $5 \times 8 - (-40) / 8$

- 40
- 45
- 34
- 50

19) Evaluate: $8 \times 6 - (-50) / 5$

- 70
- 68
- 58
- 55

20) Evaluate: $7 \times 4 - (-56) / 8$

- 30
- 40
- 35
- 45

21) Both liquids A and B used in an experiment were at a temperature of -5°C , Liquid A was heated until its temperature rose by 12°C . Write down its new temperature?

- 5
- 7
- 4
- 8

22) Both acids Oxalic Acid and Nitric Acid used in an experiment were at a temperature of 8°C , Oxalic Acid was heated until its temperature rose by 4°C . Write down its new temperature?

- 2
- 4
- 5
- 6

23) Both liquids Milk and Water used in an experiment were at a temperature of 16°C , Liquid Milk was heated until its temperature rose by 12°C . Write down its new temperature?

- 4
- 6
- 8
- 3

24) Both liquids P and Q used in an experiment were at a temperature of 26°C , Liquid P was heated until its temperature rose by 14°C . Write down its new temperature?

- 12
- 10
- 15
- 19

25) Both acids Chlorous Acid and Hydrochloric Acid used in an experiment were at a temperature of 20°C , Chlorous Acid was heated until its temperature rose by 17°C . Write down its new temperature?

- 5
- 7
- 4
- 3

26) Both acids Xenic Acid and Formic Acid used in an experiment were at a temperature of 28°C , Xenic Acid was heated until its temperature rose by 24°C . Write down its new temperature?

- 4
- 3
- 5
- 6

27) Both liquids X and Y used in an experiment were at a temperature of 36°C , Liquid X was heated until its temperature rose by 12°C . Write down its new temperature?

- 26
- 18

- 24
- 20

28) Both acids Malic Acid and Folic Acid used in an experiment were at a temperature of -26°C , Malic Acid was heated until its temperature rose by 2°C . Write down its new temperature?

- -10
- -20
- -25
- -28

29) Both liquids A and B used in an experiment were at a temperature of -46°C , Liquid A was heated until its temperature rose by 22°C . Write down its new temperature?

- -50
- -68
- -60
- -76

30) Both liquids M and N used in an experiment were at a temperature of 33°C , Liquid M was heated until its temperature rose by 10°C . Write down its new temperature?

- 35
- 29
- 20
- 23
